

HIPPO

HIPPO can be used not only in factories but also for over the counter sales with its sophisticated design.
Packs neatly regardless of the pouch material or the contents.

[Dimensions]

[Specifications]

Product name : HIPPO	Seal width : 5 mm / 0.19 in
Model : AS-V-320	Seal length : 300 mm / 11.8 in
Pump efficiency : -80 Kpa	Sealing time : 1~9 sec
Vacuumping speed : 7ℓ / min	Vacuumping time : Max. 60 sec
Vacuumping method : Nozzle	Power consumption : 200 W
Weight : 4.35 kg / 9.6 lbs	Supported bags : Width: 300 mm, Thickness:~0.18 mm (7mil) , flat bag
Voltage : 100~240 V 50 / 60 Hz	Dimensions : W 394 × D 266 × H 175.3 mm W 15.5 × D 10.5 × H 6.9 in

HIPPO

Vacuum Packing Robot "HIPPO"

Excellent vacuum performance
+ Power-saving Eco-design
Light weight compact intelligent styling

HIPPO was designed to ensure the goal "Ease of Use"

Vacuum Packing Robot "HIPPO"

Powerful vacuuming performance and power-saving of Eco-design and people will enjoy using the unit because of its design and flexible functions.

One touch fully automatic vacuuming and sealing operations and semi-automatic modes.

Can be cleaned easily with its detachable nozzle

The nozzle of the vacuum unit is detachable, and the portion in contact with the bag can be easily cleaned. You will soon be accustomed to using HIPPO in clean conditions with confidence.

HIPPO has only two buttons for basic operations - start and select buttons. You can use your favorite mode as operation can be switched between the fully automatic and semi-automatic modes.

Easy understand operation status with the LED lamps

The lighting system changes depending on the selected functions and the operational status can be understood with just a glance.

Power saving Eco-design

Power consumption is 200 W per hour.

Can vacuum and seal even highly moist contents

HIPPO is equipped with an in-built water collection cup, therefore it can be used with confidence without any worries even if liquid enters inside the bag along with air.

In-built adapter supports all voltages (100-240V)

You can use HIPPO anywhere in the world just by using tip plugs of different shapes.

Powerful vacuuming force

Vacuuming performance - 80 kPa has been achieved and is 130% of the previous product. (Asahi data)

Supports a variety of bags

Can be used for bags with opening up to 300 mm. Adjustment based on the thickness of the bag is possible by setting the seal timer. Supports various bag materials such as poly-nylon, aluminum vapor deposition, and laminations. (May differ depending on the environment)
